Digital-Literacy-Portfolio

Project Overview - This repository contains my final project for the Digital Literacy course at VIT Bhopal. As a Student Digital Ambassador, I have developed this portfolio to demonstrate essential skills in digital identity management, professional communication, and online safety.

Repository Structure-

The project is organized into the following modules: report/: Contains the full Project_Report.pdf covering all tasks and reflections. task-1-presentation/: Digital Literacy Infographic "The Student's Digital Compass". task-2-portfolio/: Screenshots of professional profiles on LinkedIn and GitHub. task-3-platforms/: Evidence of Hacker Rank coding challenges and a Google Form collaboration tool. task-4-email-etiquette/: Professional email drafts and a social media "Do's and Don'ts" checklist. task-5-cybercrime/: Case study on UPI Fraud and an 8-step prevention checklist.

Module Summaries Module 1: Digital Awareness Created a visual infographic using Canva to educate peers on safe internet practices and professional presence. Module 2: Professional Footprint Established a professional identity on LinkedIn and created a specialized GitHub Profile README. Module 3: Tools & Collaboration Successfully completed a Python coding challenge on Hacker Rank and designed a Digital Literacy Quiz (Google Form Link). Module 4: Professional Communication Drafted formal emails for assignment extensions and internship inquiries, adhering to strict email etiquette. Module 5: Cyber Security Researched a realistic UPI scam scenario and compiled a checklist of actionable safety tips, including the National Cyber Crime Helpline (1930).
